

We would like to take this opportunity to express our gratitude to WB22 in Raleigh, NC for their firm commitment to the community blood supply. Without the assistance of our local media, it would be impossible to fully inform the public about the need for blood in our area. The blood drives that WB22 has sponsored have not only educated those individuals that might not have otherwise known about blood donation, but they have provided a valuable service to our area blood banks in times of need.

This past July we again we participated in the WB22 Summer Community Blood Drive, at the Crabtree Valley Mall location. The blood drive was a huge success. A total of 80 donors participated, yielding 61 actual units of blood. Considering that our usual bloodmobile traffic averages about 40-50 donors in one day, this was an exceptional turn out. The summer months are often the most difficult time of year for blood banks, as many donors are busy with vacations and other concerns. Meeting our average number of donors becomes a challenge, and blood supplies suffer. This WB22 blood drive produced over 100 usable products - a severely needed boost for area hospitals.

We look forward to working with WB22 on future blood drives, and commend this organization for adopting such a worthwhile cause. Their efforts have made a significant difference in the continuous effort to provide life-saving blood to patients in need. Thank you for your dedication to our community.

Sincerely,

Emilie C. Sanders
